Testimonials

"It is a great privilege and experience to be part of this Study Semester program. I enjoyed a lot of fun learning activities, subjects that are filled with knowledgeable contents, and being integrated with the diversified environment. A heartwarming acknowledgment for Larissa, who prepared and organized such memorable and challenging activities. Still, there are not enough words to describe how thankful I am. It is absolutely Fantastisch!"

Frank from Philippines | Study Semester 2018

"I feel like I have learned a lot, and I think the small class size gives better access to the professors and create more individual help. I really enjoyed the atmosphere; the excursions were interesting and well organized."

Bassima from Morocco | Study Semester 2018

"The Study Semester was a perfect mixture of studying and free-time activities. I gained relevant knowledge for my field and made life-long friends from around the globe. Especially the introduction week with our coordinator Larissa made our group grow close. Thank you for these memorable experiences!"

Christiina from Finland | Study Semester 2018
